When was the last time you received anything for free?

Let Allain & Son evaluate your electrical utility usage to provide you with a free power quality assessment, which will ensure you are maximizing your utility dollars. Your only investment is a little time, a copy of your electrical costs and we will provide the solutions and the strategy.

If you are satisfied with your existing electrical contractor, that's great, but if you ever get dissatisfied we have been in business 64 years and can wait a little longer. We are an electrical contractor servicing your area with a dedicated and talented team of electricians and managers. Whether your needs are temporary labor support, predictive infra-red scanning, UL panel builds or a construction project, we would appreciate an opportunity to provide you with our service.

Our brochure shows what we do, we do what we say and do it when we say we will. Let Allain and Son become part of your team where the final invoice isn't completed until the customer satisfaction is.

Thank You
